Roundtable

Global Perspectives on China's Scientific Rise and Reach

April 19, 2023
14:00 - 15:30 (CET)

Berlin Contemporary
China Network

How have international academic exchanges and science relations with China developed over the past decades? What status do these relations have in different countries? And how do scholars from around the globe assess the impact of Chinese science and scholarship, and China's (apparently) growing engagement in academic structures abroad? In this roundtable, we will openly and informally discuss these developments. Participating scholars are not expected to represent national or official views on these topics, we are inviting them to speak from an analytical standpoint and as experts on different regions.

Participants

Sari Hanafi (American University of Beirut)
Daniel Murphy (Harvard Kennedy School)
Maria Elena Rodriguez (Pontifical Catholic University of Rio de Janeiro)
Anastas Vangeli (School of Economics and Business, Ljubljana)

Moderator

Anna L. Ahlers (Lise Meitner Research Group, MPIWG)
